# 1. Refined Use-Case Models

## 1.1 Updated Functional Requirements

1. The system must have a User Registration Page.
  - 1.1. The system must display one text field for Username.
  - 1.2. The system must display one text field for Email Address.
  - 1.3. The system must display one text field for Password.
  - 1.4. The system must display one text field for Confirm Password.
2. The system must display a “Register” button.
  - 2.1. When the user clicks “Register”, the system must validate that all required fields are not empty.
  - 2.2. When the user clicks “Register”, the system must validate that the Email Address entered is valid.
  - 2.3. When the user clicks “Register”, the system must validate that the password entered must meet the following requirements:
    - 2.3.1. A minimum of 8 characters in length.
    - 2.3.2. Contains at least one character from three of the following categories: Uppercase letter (A-Z) Lowercase letter (a-z) Digit (0-9) Special character (~`!@#\$%^&\*()\_-=}{[]\|.;'”<>.,?/).
3. The system must have a Login Page.
  - 3.1. The system must request the user’s username and password.
    - 3.1.1. Users must create unique usernames.
  - 3.2. The system must allow users to reset their account passwords through a “Forgot Password” button.
  - 3.3. When the user enters a username that is not in the database, the system must prompt the user that “The username is not found.”.
  - 3.4. When the user enters a username in the database and the wrong password, the system must prompt the user that “The password is incorrect.”
  - 3.5. When the user enters a username in the database and the correct password, the system must redirect the user to the Board View Page.
4. The system must have a Forget Password Page.
  - 4.1. The system must display one text field for the user to enter their registered email address.
  - 4.2. The system must display a text field for the user to enter their new password.
    - 4.2.1. The system must require the user to type in the new password twice to ensure the accuracy of the password.
5. The system must have a Board View Page.
  - 5.1. The system must display a button to create new projects.

- 5.1.1. The system must display one text field for Project Name.
  - 5.2. The system must display the current projects the user is a part of.
  - 5.3. The system must redirect the user to the Kanban View of the project that the user selected.
- 6. The Kanban View Page of the system must contain the main functionalities of the Kanban Board that the user can use.
  - 6.1. The system must display 4 distinct columns to represent different stages of the workflow. (To Do, In Progress, For Review, Completed)
  - 6.2. The system must be able to display task cards.
    - 6.2.1. Users must be able to create, edit or delete existing task cards.
    - 6.2.2. Users must be able to set/edit a deadline for a task.
    - 6.2.3. Users must be able to add and edit the description of a task.
    - 6.2.4. Users must be able to comment on task cards.
    - 6.2.5. Users must be able to flag a task as high priority.
    - 6.2.6. Users must be able to drag and drop tasks between different columns to update workflow progress.

## 1.2 Updated Non-Functional Requirements

### Performance

- When the user uses task-based functionalities, changes must be reflected within at least 1 minute.

### Reliability

- The system should not crash more than thrice daily.

### Security

- The system should prevent unauthorized personnel from accessing user data.
- The system should only allow registered users to view their account information.

### Scalability

- The website must be able to support 10 active users while meeting all real-time requirements.
- The website must be able to support at least 20 tasks on a board while meeting all real-time requirements.

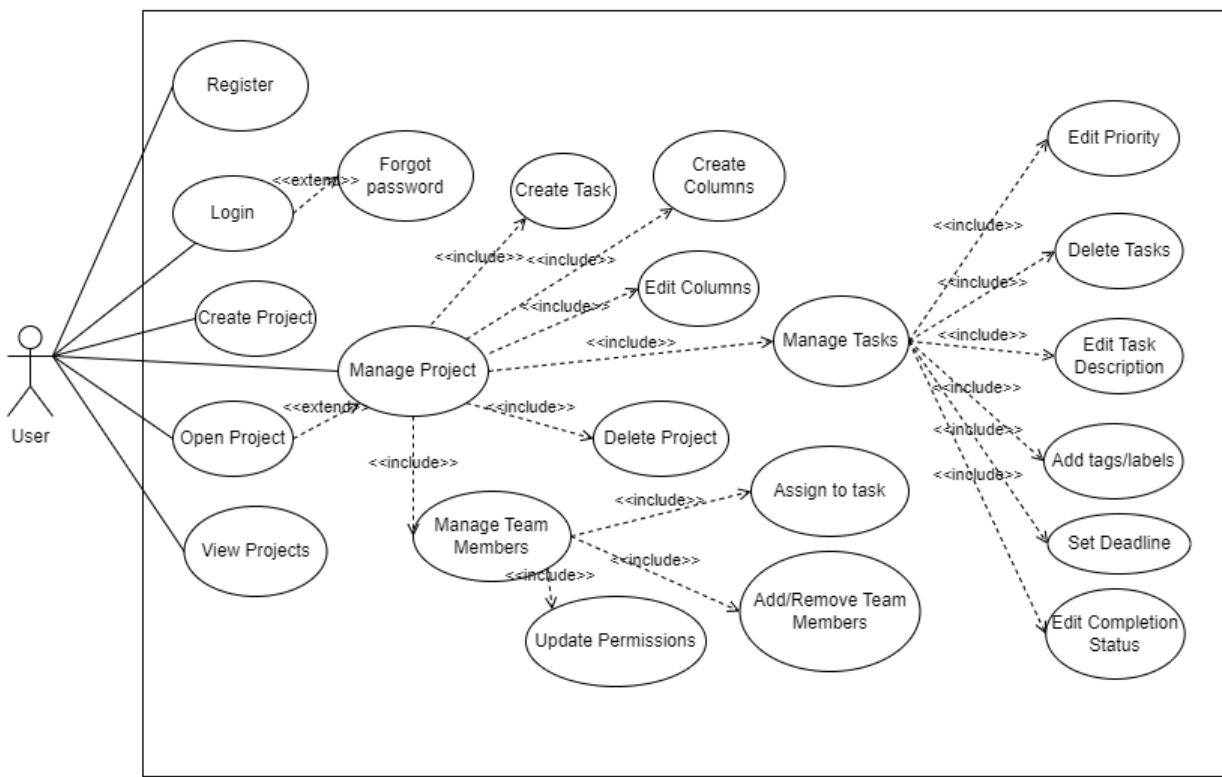

### Usability

- Features on the website must be responsive within 3 seconds of being clicked.

## 1.3 Updated Data Dictionary

Term	Definition
Kanban-board	Project management tool which is the main feature of our website. Kanban boards visually depict work at various stages of a process using cards to represent work items and columns to represent each stage of the process.
Column	Vertical division of a Kanban-board that allows users to visualize different stages of workflow
Task Card	Digital cards to represent a task in the project.
Project View	The page where users are directed to after a successful login. The User can view their projects or create a new project here.
Kanban View	The main page of a project. The main functionalities of the Kanban-board will be performed here.

## 1.4 Refined Use-Case Diagram

Kanbanize  
v0.1

## 1.5 Refined Use-Case Descriptions

### 1.5.1 Registration

Use Case ID:	UC1		
Use Case Name:	Registration		
Created By:	Samuel Seow	Last Updated By:	Samuel Seow
Date Created:	08/02/2024	Date Last Updated:	08/02/2024

Actor:	User (Initiating actor)
Description:	User registers for a new account.
Preconditions:	<ol style="list-style-type: none"><li>1. User has an email account.</li><li>2. User does not have an account registered with this email</li><li>3. User has a unique username.</li><li>4. User has a password that contains 1 of each: uppercase, lowercase and special character.</li></ol>
Postconditions:	<ol style="list-style-type: none"><li>1. User creates an account with a unique username.</li></ol>
Priority:	High
Frequency of Use:	Once
Flow of Events:	<ol style="list-style-type: none"><li>1. User is able to view "User Registration Page".</li><li>2. User will be prompted to enter a "Username", "Email", "Password" and "Confirm Password".</li><li>3. User clicks on the "Register" button.</li></ol>

	4. User's account is created and logged into his account, and brought to the Home Page.
Alternative Flows:	<p>User's Username is not unique:</p> <ol style="list-style-type: none"> <li>1. User is prompted to enter his Username again.</li> </ol> <p>User's Password does not fulfill the requirements:</p> <ol style="list-style-type: none"> <li>1. User is prompted to enter his Password again.</li> </ol> <p>User's Password and Confirm Password are not the same:</p> <ol style="list-style-type: none"> <li>1. User is prompted to enter Confirm Password again.</li> </ol>
Exceptions:	NIL
Includes:	NIL
Special Requirements:	<ol style="list-style-type: none"> <li>1. Website is able to respond to the user's inputs within 1 second.</li> <li>2. Website must be able to store at least 100 user account data.</li> </ol>
Assumptions	<ol style="list-style-type: none"> <li>1. User is connected to the internet.</li> </ol>
Notes and Issues:	NIL

### 1.5.2 Login

Use Case ID:	UC2		
Use Case Name:	Login		
Created By:	Senchia	Last Updated By:	Samuel Seow
Date Created:	08/02/2024	Date Last Updated:	08/02/2024

Actor:	User (Initiating actor)
Description:	User logs in to an existing account.
Preconditions:	1. User has registered for an account beforehand.
Postconditions:	1. User has logged in.
Priority:	High
Frequency of Use:	High
Flow of Events:	<ol style="list-style-type: none"> <li>1. User clicks on Member Login tab.</li> <li>2. Login UI displays to User.</li> <li>3. User inputs unique username and password in text boxes and click on Login Now button.</li> <li>4. Kanbanize system verifies users login credentials.</li> <li>5. User is directed to Home page.</li> </ol>
Alternative Flows:	Incorrect username or password: <ol style="list-style-type: none"> <li>1. Login UI displays “incorrect username or password”.</li> <li>2. System returns to step 1.</li> </ol>
Exceptions:	NIL
Includes:	NIL
Special Requirements:	NIL
Assumptions:	1. User is connected to the internet.
Notes and Issues:	NIL

### 1.5.3 Create Project

Use Case ID:	UC3
--------------	-----

Use Case Name:	Create Project		
Created By:	Samuel Seow	Last Updated By:	Senchia
Date Created:	08/02/2024	Date Last Updated:	08/02/2024

Actor:	User (Initiating actor)
Description:	User creates a project.
Preconditions:	<ol style="list-style-type: none"> <li>1. User must have a Kanbanize account.</li> <li>2. User must be logged in.</li> <li>3. User is at the Home Page.</li> </ol>
Postconditions:	<ol style="list-style-type: none"> <li>1. User creates a New Project.</li> </ol>
Priority:	High
Frequency of Use:	High
Flow of Events:	<ol style="list-style-type: none"> <li>1. User is at the Kanbanize Home Page.</li> <li>2. User clicks on "Create New Project".</li> <li>3. A new project is created and the user is brought to that particular Project Dashboard.</li> </ol>
Alternative Flows:	NIL
Exceptions:	<ol style="list-style-type: none"> <li>1. Project name is the same as a previously named project.</li> </ol>
Includes:	NIL
Special Requirements:	<ol style="list-style-type: none"> <li>1. User is connected to the internet.</li> </ol>
Assumptions	<ol style="list-style-type: none"> <li>1. User has an account and is logged in.</li> </ol>

	2. User is connected to the internet.
Notes and Issues:	NIL

#### 1.5.4 Add Task

Use Case ID:	UC4		
Use Case Name:	Add Task		
Created By:	Samuel Seow	Last Updated By:	Senchia
Date Created:	08/02/2024	Date Last Updated:	08/02/2024

Actor:	User (Initiating actor)
Description:	User will be able to add tasks in a selected project
Preconditions:	<ol style="list-style-type: none"> <li>1. User must be logged in.</li> <li>2. User must have a registered account.</li> </ol>
Postconditions:	<ol style="list-style-type: none"> <li>1. User adds a task.</li> </ol>
Priority:	High
Frequency of Use:	High
Flow of Events:	<ol style="list-style-type: none"> <li>1. Select the desired project.</li> <li>2. Click on add tasks on the top right corner of the page.</li> <li>3. Fill in the “Description”, “Due Date” and “Progress” status.</li> <li>4. Task is created once user clicks “create”.</li> </ol>

Alternative Flows:	Add tasks directly to the desired column: <ol style="list-style-type: none"> <li>1. Select the desired project.</li> <li>2. Click on add tasks on the top right corner of the particular column.</li> <li>3. Fill in the “Name”, “Description” and “Due Date”.</li> <li>4. Task is created once user clicks “Create”.</li> </ol>
Exceptions:	NIL
Includes:	<ol style="list-style-type: none"> <li>1. Name</li> <li>2. Due Date</li> <li>3. Status of Completion</li> <li>4. Description</li> </ol>
Special Requirements:	NIL
Assumptions	<ol style="list-style-type: none"> <li>1. User has an account and is logged in.</li> <li>2. User is connected to the internet.</li> </ol>
Notes and Issues:	NIL

### 1.5.5 Edit Task Status

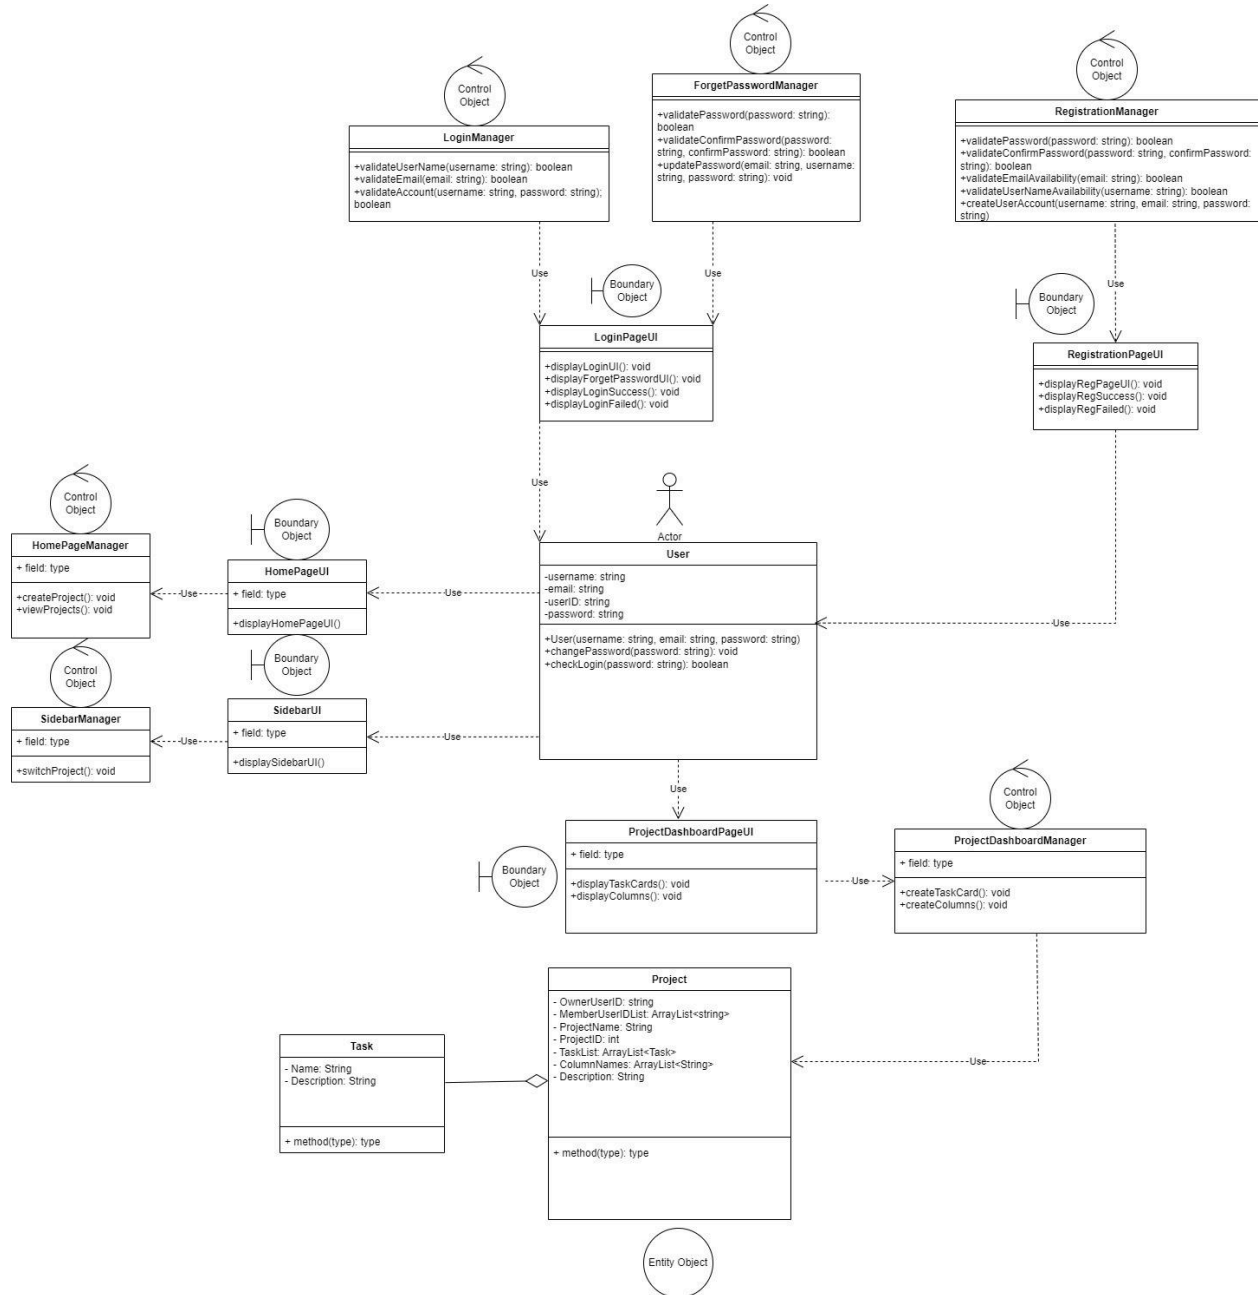

Use Case ID:	UC5		
Use Case Name:	Edit Task Status		
Created By:	Samuel Seow	Last Updated By:	Willy
Date Created:	09/02/2024	Date Last Updated:	09/02/2024

Actor:	User (Initiating actor)
--------	-------------------------

Description:	User updates the status of the task in a project.
Preconditions:	<ol style="list-style-type: none"> <li>1. The User must be a member of the project.</li> <li>2. The User must be at the Project Dashboard Page of the project.</li> </ol>
Postconditions:	<ol style="list-style-type: none"> <li>1. The status of the task is updated.</li> </ol>
Priority:	High
Frequency of Use:	High
Flow of Events:	<ol style="list-style-type: none"> <li>1. User clicks and holds on a Task Card.</li> <li>2. User drags the Card to another Column.</li> <li>3. User releases the click.</li> </ol>
Alternative Flows:	<ol style="list-style-type: none"> <li>1. User clicks on a Task Card and opens the Task Card Window of the task.</li> <li>2. User clicks on the “Status” field and changes the status.</li> <li>3. User confirms changes.</li> </ol>
Exceptions:	NIL
Includes:	NIL
Special Requirements:	NIL
Assumptions	<ol style="list-style-type: none"> <li>1. The User must be connected to the internet.</li> <li>2. The User must have a Kanbanize account.</li> <li>3. The User must be logged in.</li> </ol>
Notes and Issues:	NIL

## 2. Conceptual Model

### 2.1 Class Diagram of Entity Classes

## 2.2 Initial Boundary Classes

1. Kanbanize Website
  - a. RegistrationPageUI
  - b. LoginPageUI
  - c. HomePageUI
  - d. ProjectDashboardPageUI
  - e. SidebarUI

## 2.3 Initial Entity Objects

1. UserInfoDatabase
2. ProjectsDatabase

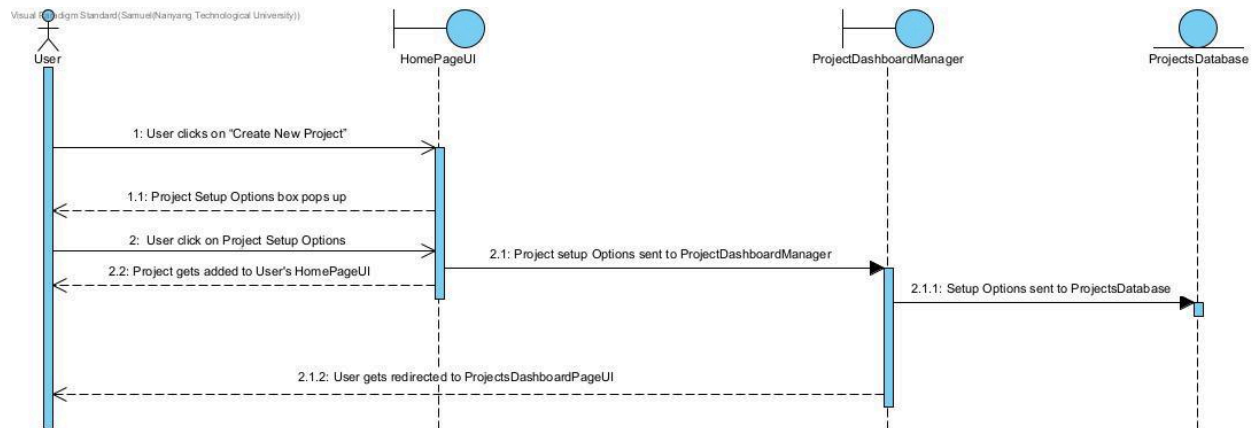

## 2.4 Initial Control Objects
